Yemen Arab Republic

OFFICIAL STANDARD NAMES

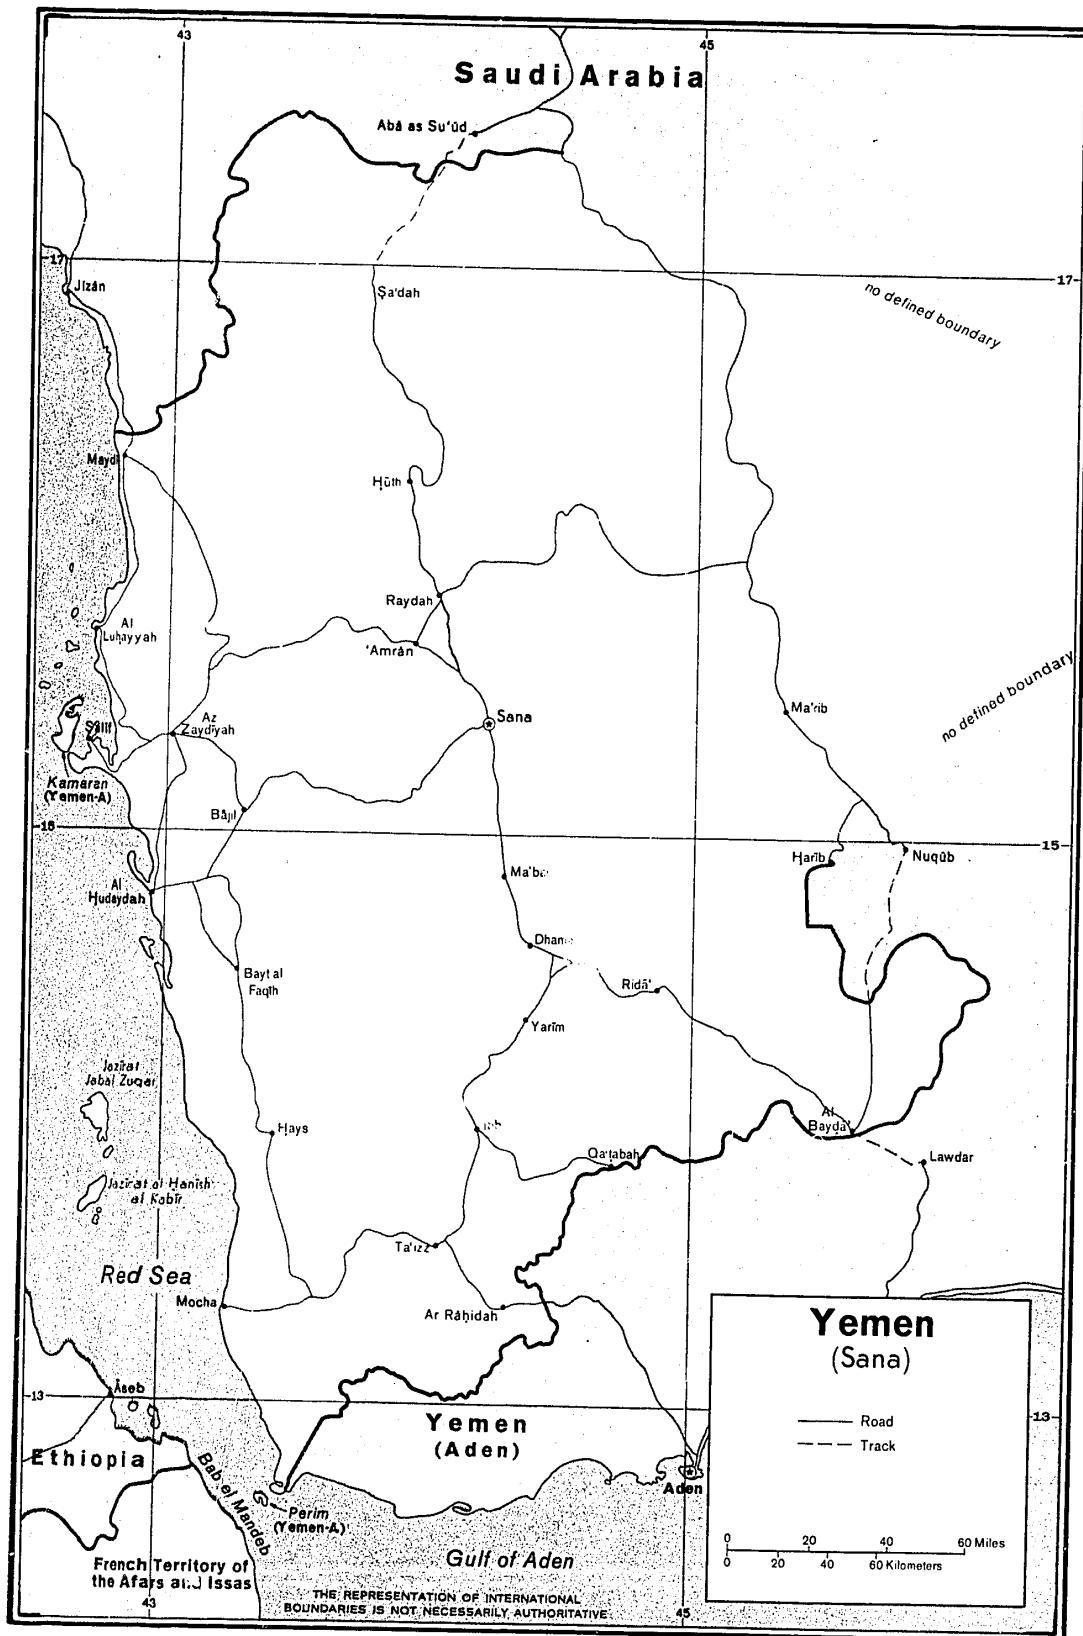

approved by the

UNITED STATES BOARD ON GEOGRAPHIC NAMES

Prepared by the

Defense Mapping Agency Topographic Center

Washington, D. C. 20315, November 1976

FOR E W O R D

This gazetteer contains about 7,400 entries for places and features in the Yemen Arab Republic. The research for this publication was completed in April 1975.

The entries include standard names approved by the U.S. Board on Geographic Names and unapproved variant names, the latter cross-referenced to the standard names. *Users of the gazetteer should always refer to main entries for approved names.*

The names in this gazetteer supersede those in all previous Board lists for the area.

The basic name coverage corresponds generally to that of maps at the scale of 1:250,000. Entries include the names of populated places of all sizes, various other cultural entities, and a variety of physical features.

Most of the entities can be identified and located by the approved name or a recognizable variant of the approved name on one or more of the following sources:

1. *The Yemen Arab Republic and Neighbouring Areas 1:250,000*, Director of Military Survey, Ministry of Defence (U.K.), 1974.
2. *South Arabia 1:100,000* (Series Nos. K669 and K667), Directorate of Military Survey (U.K.), 1958-69.
3. *Arabian Peninsula 1:500,000* (Series K462), Army Map Service or Directorate of Military Survey (U.K.), 1963.
4. British Admiralty charts, Hydrographic Department, Admiralty, London, various dates and scales.

Interpretation of entries

It has been necessary to express in code numbers and letters some of the information in this gazetteer in order to accommodate it to machine tabulation.

Name.—Approved standard names and unapproved variant names appear in the first column. The variant names are always cross-referenced to the standard names by use of the word "see."

Cross-references usually have been omitted for such variant spellings of *Jabal*, as *Gebel* and *Jebel*, and differences in the spellings of the article, *al*, *el*, *an*, etc. Names containing generic elements preceding the specific term (except names of populated places) are alphabetized by the specific part; thus *Jabal Burayrah*, the name of a mountain, is listed as *Burayrah, Jabal*. Where part of a name is underlined, the use of the part not underlined is optional. Where two or more names are approved for a feature, each is identified in parentheses and any or all may be used.

Language labels are used to identify alternate local names of noninternational features. Local names of international features are identified by major-political-entity labels. Yemen (Sana) and Yemen (Aden) have been used to identify the Yemen Arab Republic and the Peoples Democratic Republic of Yemen, respectively. Features of undetermined sovereignty have not been labeled but have been identified by a special area number (41599).

As far as possible, Arabic names in this gazetteer have been romanized from Arabic script according to the transliteration system used jointly by the Board on Geographic Names and the Permanent Committee on Geographical Names for British

Official Use (the BGN/PCGN 1956 System), which follows on pages vii through xii. It is almost always necessary to add missing symbols for short vowels (vowel points) in Arabic script and to rewrite dialectal forms in standard written Arabic. Names found written only in roman letters but recognizable as Arabic have been reconstructed into Arabic script and then transliterated.

Where the complete Arabic script form of a name could not be determined, the name has been cited as found in Roman script source materials. Such names are identified by an asterisk (*) preceding the designation. Recognizable Arabic parts of such names are romanized in accordance with the BGN/PCGN 1956 System.

The diacritical marks used in approved Arabic names in the area covered by this gazetteer are the macron (̄), the cedilla (٫), and the acute accent (ؑ). These marks are to be used whether the names are written in capital or lowercase letters. In addition, the apostrophe (') and the inverted apostrophe (‘), representing the letters *hamzah* and *'ayn*, respectively, frequently occur in Arabic names.

In writing Arabic names in capital and lowercase letters, every word in a name should begin with a capital letter except the following when they are not name-initial: *wa* (and) and the definite article *ad*, *aq*, *adh*, *al*, *an*, *ar*, *as*, *aq*, *ash*, *at*, *aq*, *ath*, *az*, and *aq*. The nonstandard Arabic article *am*, which occurs infrequently, has been changed to the appropriate standard Arabic form. The word *Aī* (with a macron) should not be confused with the definite article, and should always begin with a capital letter.

Designation.—The second column contains designations or abbreviations of designations, as listed below. Because practically all geographic terms have varied meanings, the senses in which the designator terms are used and the range of features to which they are applied in this gazetteer are

stated in the list to reduce ambiguity. The distinctions that can be made in a given gazetteer will vary with the quality of the maps of the area and with the nature of the entities that are named. Some of the features do not fit precisely into the categories used to designate them and others could be designated in two or more ways.

ADMD	first-order administrative division (<i>liwā'ī</i>); second-order administrative division (<i>qadā'</i>)
AREA	area (tract of land identified by a name, but without homogeneous character or established boundaries; may be identified and named for characteristics which no longer pertain to it); camping area (tract of land used seasonally or permanently for camping)
BAY	bay (coastal indentation of a size intermediate between a gulf and a cove)
BNK	bank (an elevation of the sea floor located on a continental [or island] shelf area over which the depth of water is relatively shallow, but sufficient for safe surface navigation. It may support islands, shoals, reefs, or bars on its surface which are dangerous to navigation)
BRKS	barracks
BSNH	headwater basin (area drained by the headwaters of one or more streams)
CHNM	marine channel (channel between coastal islands, reefs, or shoals; between an offshore feature and the mainland; or through a shallow marine water body)
DPR	depression (lower area wholly or largely surrounded by higher land; ordinarily has interior drainage and does not conform to the valley of a single stream)
DSRT	desert (barren tract characterized by arid climate and sparse xerophytic vegetation)
DUNE	dune(s); sand ridge (hill or ridge of sand formed by the action of wind)

FT	fort (defensive structure or works, generally of little or no military significance; may be in a state of ruin)	PT	point (relatively minor projection of land into a water body, or its extremity)
HBR	harbor (body of water providing shelter for ships)	RDGE	ridge (elongated, relatively narrow relief feature with a more or less continuous crest)
HDLD	headland (conspicuously high piece of land jutting out into or fronting the sea)	RF	reef (offshore consolidated rock hazard to navigation with a least depth of 20 meters [or 10 fathoms] or less)
HLL	hill (landform of moderate relief, moderate elevation, and small summit area)	RGN	region (large area recognized as an entity by reason of the unity of its history, people, landscape, or other condition or a combination of conditions)
HLLS	hills	RKSL	rocks on land (boulders, pinnacles, crags, or other rocks or rock outcrops situated on land)
INLT	inlet (small, narrow indentation in a coast)	RKSW	rocks in water
ISL	island	RKW	rock in water (individual rock of such character and importance as to be identified by name, situated either above or below the surface of a body of water; often associated with reefs but separately named)
ISLS	islands	RUIN	ruin(s) (structure(s) in a state of ruin, but not necessarily of great antiquity or archeological interest)
LCTY	locality (minor area or place of unspecified or mixed character)	SAND	sand area (includes large tracts of desert sand not in the form of dunes)
LGN	lagoon (water body along a coast, largely or wholly cut off from the sea by a barrier beach or other depositional feature)	SEA	sea
LT	light (a lighted aid to navigation)	SHOL	shoal (an offshore hazard to navigation with a least depth of 20 meters [or 10 fathoms] or less, composed of unconsolidated material)
MNN	salt mines	SPUR	spur (sloping ridge extending from a mountain or other elevation)
MSQE	mosque	STM	stream (river or other running, fresh water body, perennial in all or a part of its course)
MT	mountain (landform of conspicuous relief, moderate to high elevation, and small summit area)	STMX	section of stream
MTS	mountains	STRT	strait (relatively narrow water passage connecting larger bodies of water)
PASS	pass (way over, through, or between mountains or other high land); gap (low place in the relatively even crestline of a ridge or other elongated relief feature, apparently not used as a pass)	TRB	tribal area
PCLI	independent political entity (republic)	WAD	wadi (watercourse or drainageway that carries only occasional flows of water)
PCLQ	ancient kingdom	WADX	section of wadi
PEN	peninsula (the Arabian Peninsula)		
PK	peak (separately named summit on a more extensive elevation)		
PLN	plain; coastal plain (landform of low relief, slope, and elevation)		
PPL	populated place (city, town, village, settlement)		
PRT	port (place where waterborne cargo is transferred to and from ships, including facilities for berthing ships and handling cargo)		

WLL well (dug or drilled source of water)
 WLLS wells

Latitude and longitude.—The third and fourth columns indicate geographic coordinates, with longitude based on Greenwich. Coordinates were generally read to the nearest minute and are for finding purposes only.

Coordinates were read at the map symbol for populated places and other entities occupying limited sites, at the mouths or lower ends of wadies, at the summits of mountains and hills, at the extremities of points, and near the centers or midpoints of other features.

Area number.—The number in the fifth column is the code number for the country or area of undetermined sovereignty in which the place or feature is located. Area number 41570 has been utilized for features in the Yemen Arab Republic [Yemen (Sana)]. Area number 41599 has been assigned to islands, reefs, shoals, rocks, and associated features in the Red Sea for which it is not possible to ascertain sovereignty.

Although first- and second-order administrative division names were approved in Yemen (Sana), a lack of suitable material for establishing internal boundaries prevented further refinements in the country code numbers to reflect the first-order administrative division in which features are located.

Glossary of generic terms

The following terms occur as the generic parts of standard names in the gazetteer. The English term or terms which correspond to each local term were applied after objective study of cartographic and other source materials, and do not necessarily reflect dictionary or other normalized usages.

abraq hill(s)

'alam	mountain
'aqabat	pass
āthār	ruins
bāb	gap
baḥr	bay
barq	hill
barqā'	hill
bi'r	well
birḥ	pass
duḥayḍat	hill
ghayl	wadi
ghubb	bay
haḍbat	mountain
hayd	hill, ridge
husūn	ruins
'irq	ridge, sand ridge
jabal	hill, mountain
jaww	depression
jazā'ir	islands
jazīrat	island
jibāl	mountain(s)
khalij	bay
khawr	bay, inlet, lagoon
khirbat	ruins
kitf	point
madiq	marine channel
marsā	harbor, inlet
mikhlaf	camping area
najd	pass
naqil	pass
qā'	depression, plain
qafrat	desert
qarn	mountain
ramlat	sand area
ra's	headland, point
saylat	stream, wadi
sha'ib	wadi
shaqqat	depression

shi'b wadi
wādi vadi

Reporting of errors

It is requested that all who use this gazetteer aid in its correction for future printings by reporting errors and name changes including, if possible, the source of the correct information to:

Executive Secretary
U.S. Board on Geographic Names
Department of the Interior
Washington, D.C. 20240

or

Defense Mapping Agency Topographic Center
ATTN: Geographic Names Division, Code 50400
Washington, D.C. 20315

Geographic names or their spellings do not necessarily reflect recognition
of the political status of an area by the United States Government.

TRANSLITERATION SYSTEM FOR ARABIC GEOGRAPHIC NAMES

BGN/PCGN 1956 System (Revised in 1972)

The BGN/PCGN 1956 System for the Arabic alphabet is designed for use in transliterating standard written Arabic. It was adopted by the BGN in 1946 and by the PCGN in 1956 and has been applied by the Board, so far as practicable, to the systematic romanization of geographic names in Syria, Lebanon, Jordan, Iraq, the Arabian Peninsula, the United Arab Republic (Egypt), Libya, the Sudan, and Tunisia.

The system is designed to bring about uniformity in the spelling of geographic names in Arabic-language areas by eliminating deviations resulting from pronunciation differences in various dialects, except as stated in the special rules.

In contrast to several other languages, uniform results in the transliteration of Arabic are difficult to obtain, since vowel points and some of the diacritical marks necessary for the certain identification of the Arabic words are almost always omitted from both handwritten and printed Arabic. It follows that the transliterator must be able to identify the

words used in the names and must know their standard written Arabic spelling, their proper vowel pointing, and how to eliminate peculiarities resulting from dialectical variation. The problem is complicated in most Arabic-language areas by the fact that a large proportion of the geographic names are not available in the Arabic alphabet. This applies to Arabic names as well as to those of non-Arabic origin. Even when Arabic script is available it is not always possible to determine the proper voweling from dictionaries and other reference tools.

The transliteration of the Arabic consonants, vowels, and diphthongs, with examples of the application to geographic names, is given in the tables. *Hamzah*, often omitted in such tables, is included in its logical position before *alif* as a consonant in order to avoid any question as to its proper treatment.

The notes and special rules explain details of transliteration not stated in the tables.

TRANSLITERATION SYSTEM FOR ARABIC GEOGRAPHIC NAMES

TABLE I

TRANSLITERATION OF THE ARABIC CONSONANTS

(Only the isolated forms of the letters are given; see any Arabic grammar or standard reference work for the combining forms in initial, medial, and final positions and for consonant ligatures.)

ARABIC LETTER	NAME OF LETTER	TRANSLITERATION	EXAMPLES AND REMARKS
ء	hamzah	omit (initial)	أبوكمال Abū Kamāl
		' (medial)	بئر زيت Bi'r Zayt. See note 1.
		' (final)	صَنْعَاء Ṣan'a'
ا	alif	omit	أم العمد Umm al 'Amad. See note 2.
ب	bā'	b	البحرين Al Bahrayn
ت	tā'	t	الكوت Al Kūt. The combination of tā' with bā' can be rendered as t/h for bibliographical purposes. See notes 3 and 4.
ث	thā'	th	الثلثيات Ath Thulaythuwāt. See remarks on tā'.
ج	jīm	j	الجزيرة Al Jazīrah
ح	ḥā'	ḥ	المحمودية Al Maḥmūdiyah. See note 5.
خ	khā'	kh	خيبر Khaybar. See remark on kāf.
د	dāl	d	Damanhūr. The combination of dāl with bā' can be rendered as d/h for bibliographical purposes. See note 4.

TABLE I (Continued)

ARABIC LETTER	NAME OF LETTER	TRANSLITERATION	EXAMPLES AND REMARKS
ذ	dhāl	dh	وادي الذهب Wādī adh Dhahab. See remark on <i>dāl</i> .
ر	rā'	r	الروضة Ar Rawḍah
ز	zāy	z	الزاوية Az Zāwiyah
س	sīn	s	Sulaymāniyah. The combination of <i>sīn</i> with <i>hā'</i> can be rendered as s/h for bibliographical purposes. See note 4.
ش	shām	sh	Ash Shām. See remark on <i>sīn</i> .
ص	ṣād	ṣ	قصومة Qayṣūmah. See note 5.
ض	ḍād	ḍ	ضور Dawr. See note 5
ط	ṭā'	ṭ	القنيطرة Al Qunayṭirah. See note 5.
ظ	ẓā'	ẓ	أبوظبي Abū Ḫābi. See note 5.
ع	‘ayn	‘	أبوعرش Abū ‘Arīsh. This is a raised turned comma.
غ	ghayn	gh	بغداد Baghdad
ف	fā'	f	الفرات Al Furāt
ق	qāf	q	قطر Qatar
ك	kāf	k	Al Kuwayt. The combination of <i>kāf</i> with <i>hā'</i> can be rendered as k/h for bibliographical purposes. See note 4.

TABLE I (Continued)

ARABIC LETTER	NAME OF LETTER	TRANSLITERATION	EXAMPLES AND REMARKS
ل	lām	l	لَهْبَ حلب Haleb
م	mīm	m	مَكَّةَ Makkah
ن	nūn	n	نَخْلٌ Nakhl
ه	hā'	h	جَبَلُ هَارُونَ Jabal Hārūn. See remarks on <i>tā'</i> , <i>dāl</i> , <i>sīn</i> , <i>kāf</i> ; see also notes 3 and 4.
و	wāw	w	وَادِيٌ مُوسَى Wādi Mūsā
ي	yā'	y	الْيَمَنُ Al Yaman. See notes 1 and 6.

NOTES

1. *Hamzah* is written in Arabic over all initial *alif*'s except those which belong to the definite article *al* or bear a *maddah* (see note 10). When the purpose is to indicate the presence of the sound described as a glottal stop, it is written over internal and final *alif*, *wāw*, and *yā'* (without dots). *Hamzah* following *i* is written ئ (almost always the *yā'* is in the ئ or ؤ form) and the dots are omitted. Example: ش. *Hamzah* following *u* is written ؤ. *Hamzah* following a long vowel is written ئ without anything under it ("without a bearer"). The transliteration of *hamzah* ('') should always be carefully distinguished from that of "ayn ('').
2. *Alif* as such is not transliterated when it is bearer of *hamzah*, but see *fatḥab alif* and *alif maddah* in Table II. See also note 1 above and note 10.
3. An original *tā'* in certain endings is written ة (i.e., *bā'* with two dots) and is called *tā'* *marbūṭah*. It is transliterated h (silent), except when followed by another word in a unitary expression, when it is transliterated t, as in *hamzah* (isolated form) and *hamzat al wasl*. A pronounced final *hā'* occurs and for bibliographical purposes may be transliterated /h when a *fatḥab* precedes it (Al Mara/h). Cf. also note 4.
4. The two-letter symbols *th*, *kh*, *dh*, *sh*, and *gh* are convenient for use and easily comprehensible. The infrequent sequences of *t*, *k*, *d*, or *s* followed by *h* can be unequivocally transliterated for bibliographical purposes by the use of a slant line ("shilling," "solidus") to separate true *h* from a preceding *t*, *k*, *d*, or *s*; that is, *th* represents *thā'*, but *t/h* stands for *ta'* followed by *hā'*. Cf. also note 3.

5. Where special considerations are paramount, the sub-dot (*h*, *s*, *d*, *t*, *z*) may be used in place of the cedilla (*h̄*, *s̄*, *d̄*, *t̄*, *z̄*).
 6. The letter *yā'* is also used in writing *alif maqṣūrah* in which the dots are omitted. See Table II.

TABLE II
TRANSLITERATION OF THE ARABIC VOWELS,
DIPHTHONGS, AND SPECIAL DIACRITICAL MARKS

ARABIC LETTER	NAME OF LETTER	TRANSLITER-ATION	EXAMPLES AND REMARKS
ف	fathah	a	البصَرَةُ Al Baṣrah. Placed over consonant after which pronounced.
ك	kasrah	i	الرِّيَاضُ Ar Riyāḍ. Placed under consonant.
ڭ	dammah	u	القُدْسُ Al Quds. Placed over consonant.
ف	fathah alif	ā	بَابُ الْمَنْدَبِ Bāb al Mandab. See note 2.
ي	kasrah yā'	ī	الْمَدِينَةُ Al Madīnah
و	dammah wāw	ū	صُورَ Šūr
ى	alif maqṣūrah	á	مَرْسَى مَطْرُوحُ Marsá Matrūh
ـ	sukūn (jazmah)	omit	Placed over consonant.
ي	fathah yā' sukūn	ay	صَيْدَا Saydā
و	fathah wāw sukūn	aw	الْدَوْهَةُ Ad Dawhah
ـ	tanwīn fathah	a ⁿ	See note 7.
ـ	tanwīn kasrah	i ⁿ	See note 7.
ـ	tanwīn dammah	u ⁿ	See note 7.
ـ	tashdīd	doubling	See note 8.
ـ	hamzat al wasl	'	See note 9.
ـ	alif maddah	ā (initial) 'a (medial)	آلُوبُ معَيْطُ قُرَآنٌ Ālbū Mu‘ayyidh Qur’ān. See note 10.

NOTES

7. The classical Arabic grammatical endings written with the so-called nunation symbols (Arabic *tawīn*) may be transliterated when necessary by *aⁿ, iⁿ, uⁿ*. In modern Arabic these endings have become silent and are omitted in transliteration: classical *alif/uⁿ*, modern *alif*.
8. Doubled consonant sounds are written in Arabic by placing the *tashdid* over the consonant letter written once. In transliteration the letter should be doubled. When the definite article *al* precedes a word beginning with *t, th, d, dh, r, s, sh, s̄, d̄, t̄, z, l, n* (the so-called "sun letters"), the *l* is assimilated in pronunciation, giving *tt, thth, etc.*

In transliteration this *l* should be omitted and the following letter written twice, once after the *a* of the article and secondly at the beginning of the next word. Example: An Nil, not Al Nil.

9. *Hamzat al wasl* is transliterated ' in classical forms, as illustrated in its classical name *hamzatu'l wasl*, but ignored in modern forms, as in *hamzat al wasl*.
10. *Maddab* is a horizontal wavy line over *alif*. Since *maddab* nearly always occurs in word-initial position, no confusion results from the use of ā for *alif maddab* as wel' as for *fathab alif*.

SPECIAL RULES

The following notes explain details of transliteration not stated above.

1. Initial definite articles and prepositions should be capitalized and hyphens should not be used to connect parts of names; e.g., Ash Shāriqah and Tall al Lahm.
2. If any evidence is found for the use of the definite article in a name, the article will be used in the name chosen.
3. The Arabic word for God will be written Allāh.
4. Phrase names, commonly transcribed as one word, will be written in separate words. The definite article within such names will be written *al*, not *ul*; e.g., 'Abd Allāh, 'Abd ar Rahmān, Dhū al Faqār.
5. The word Ibn will be transliterated Bin wherever written, without *alif*, that is, between two proper nouns; e.g., 'Umar Bin al Khātāb.
6. The Turkish word Paşa will be transliterated directly from Arabic script as Bāshā'; the Turkish word Bey will be romanized as Bey in Egyptian names, no matter how written in Arabic-language sources, but in other Arabic areas as Bak where

written bā'-kāf and as Bayk where written bā'-yā'-kāf.

7. The modern colloquial word Sīdī will be given precedence over the classical form Sayyidi. (This does not preclude the spelling Sayyidi if the latter is indicated by the Arabic script or other evidence — for instance if the yā' is written with *tashdīd*.)

8. The colloquial word Bū will not be changed to the classical form Abū.

9. The colloquial word for water written mīm-yā'-tā' on Arabic maps will be transliterated Mayyat.

10. In place names of Aramaic origin in Lebanon and Syria with an initial cluster beginning with *b* plus another consonant such as *l* or *h*, initial clusters such as *bl* and *bh* will be written.

11. In names containing the words for "back, ridge, hill" appearing as either zā'-bā'-rā' or qād-bā'-rā' in Arabic sources, the spelling used in the sources will be followed.
